

## EXERCISE: PULL BARGS INTO THE TEST

- ▶ We want to update `bargs.spec.js` to "require" *bargs* and test the `parse()` function
- ▶ **Add this to the top of `bargs.spec.js`:**
  - ▶ `const {parse} = require('..');`

## A UNIT TEST

- ▶ We're going to write a **unit test**
- ▶ A unit test is a test that makes an assertion about a **unit**
- ▶ A unit is the *smallest testable bit of code*
- ▶ What is the smallest testable bit of code?
