

OUTPUT: MOCHA-IFY BARGS TESTS (FAILURE!)

```
✓ should throw a TypeError
✓ should throw a TypeError

1) should return an object having property foo:
true
+   foo: true
-   foo: false
}

2 passing (9ms)
+ expected - actual

1 failing

1) should return an object having property foo:
true:
{
  "_": []
-  "foo": true
+  "foo": false
}

AssertionError [ERR_ASSERTION]: Expected
values to be strictly deep-equal:
+ actual - expected
```

ANSWER: MOCHA-IFY BARGS TESTS

```
test/bargs.spec.js
```

```
const assert = require('assert');
const {parse} = require('..')

it('should throw a TypeError', function() {
  assert.throws(() => {
    parse({
      expectsValue: {}
    }),
    {
      name: 'TypeError',
      message: /object is not iterable/
    }
  });
});

it('should throw a TypeError', function() {
```

```
    parse({
      expectsValue: 1
    }),
    {
      name: 'TypeError',
      message: /number 1 is not iterable/
    }
  });
});

it('should return an object having property foo:
true', function() {
  assert.deepStrictEqual(parse(['--foo']), {_:
[], foo: true});
})
```
