

ANSWER: OUR FIRST EXCEPTION ASSERTION

```
test/bargs.spec.js
```

```
const assert = require('assert');
const {parse} = require('..');

assert.throws(() => {
  parse({
    expectsValue: {}
  }),
  {
    name: 'TypeError',
    message: '/object is not iterable/'
  }
});
```

EXERCISE: OUR SECOND EXCEPTION ASSERTION

- ▶ **Add another assertion, but this time use the following for opts:**
 - ▶ `{expectsValue: 1}`
