

ANSWER: USING THE ASSERT MODULE

```
test/bargs.spec.js
```

```
const assert = require('assert');
```

```
assert.ok(false);
```

EXERCISE: FIX THE “HELLO WORLD” TEST

- ▶ **Update `bargs.spec.js` so that the test “passes”**
 - ▶ i.e., *nothing happens when you run it*
- ▶ **Run the test again:**
 - ▶ `node test/bargs.spec.js`
