EXERCISE: RUN MOCHA

▸ **Open `package.json` and add a test script:**

▸ `"scripts": {"test": "mocha test/bargs.spec.js"}`

▸ **Run your tests:**

▸ `npm test`

▸ (You should see "0 passing")

TESTS IN MOCHA

▸ A **test** in Mocha:

    ▸ Has a `title` **string**

    ▸ Has a `body` **function**

▸ `body` **contains an assertion**

▸ `title` **describes behavior**

▸ **Mocha's default API mimics natural language**

▸ *Global* **API:**

    ▸ `it(title, body)`

▸ `body` **can return a** `Promise` **or use an "error-first" (Node.js-style) callback**
