SETUP: GET WORKSHOP MATERIALS

▸ **Clone the workshop repository and install:**

▸ `git clone https://github.com/boneskull/dead-simple-testing-with-mocha`

▸ `cd dead-simple-testing-with-mocha`

▸ `npm install`

▸ `cd 01-setup`

EXAMPLE PROJECT: BARGS

▸ The *bargs* package is a command-line argument parser

▸ These are command-line arguments: `--foo --bar=baz`

▸ Project structure:

```
└── bargs
    ├── package.json
    └── src
        └── index.js
```

▸ **Open `bargs/src/index.js` in your editor**
